**The World's
Premium Fasteners
for Harley-Davidson®
Motorcycles**

Manufactured in England from 316 stainless steel, which is superior in strength and corrosion resistance to the more common A2 steel. We are proud to offer an exceptional quality product to a mirror finish – absolutely no polishing is required. The added advantage of Pro-Bolt stainless steel is – it won't chip or

flake. It's easy to clean and retains its Brilliant Shiny finish. It offers the classic appeal of Chrome but with the hardness of Stainless Steel.

Please be aware that not all stainless steel is suitable for stress areas – however our 316 stainless steel bolts offer rolled threads for greater strength – they are suitable for Primary Covers, Transmission Covers, Cam Covers, Lifter Block Covers, Rocker Box Covers, Gearcase/Front Sprocket Covers and more. Our fasteners exceed D.O.D, M.O.T and factory standards.
